

CYBERSHEATH STRATEGIC ADVISORY DATASHEET

11710 Plaza America Drive, Suite 2000, Reston, VA 20190 | www.cybersheath.com | +1-855-384-8070

Strategic Advisory Services

CyberSheath can help you answer strategic questions with fact based analysis. Questions may include:

Should security report into IT?

How can I measure my security organization?

Have we invested in the right people, processes, and technology?

CyberSheath works with security organizations to establish a measurable and effective security strategy that can be explained to the board and your business stakeholders. Our decades of experience from the board room to the security operations center floor has taught how to think and plan strategically in parallel with day to day tactical delivery.

Our methodology compels information security organizations to align with and contribute to business objectives in a way that measures risk in terms the business can understand.

Don't let the day to day operational maintenance become your default strategy, let CyberSheath enable you to create, implement and measure a long-term strategic plan that you can take to the business.

protecting your vital assets

Security Strategic Planning Process

The CyberSheath Security Strategic Planning Process sets one and three year targets for strategic objectives that enable the business. We set the long-term time horizon for the Strategic Plan at three years, which we consider the longest period of time where there is enough stability with external factors to make planning useful, and long enough to accomplish significant breakthrough changes.

1 BUSINESS ANALYSIS AND STRATEGY DEVELOPMENT

Learn how to gather and analyze available data and security metrics, develop a strategy, strategic objectives, and the initiatives to achieve your goals.

3 IMPLEMENTATION AND EXECUTION

Action plans are implemented and strategic planning process status reviews are conducted.

2 STRATEGY DEPLOYMENT

Develop action plans, cascade objectives and initiatives throughout the organization and communicate strategic objectives and initiatives to the business.

4 STRATEGIC PLANNING PROCESS EVALUATION AND IMPROVEMENT

Annual evaluation and improvement of strategic planning process.

KEY BENEFITS

- ✓ Educate and Inform the Board
- ✓ Buy-In for Long-Term Strategy Vs One Off Project Approvals
- ✓ Define Metrics to Manage Your Security Portfolio
- ✓ Align Projects with an Overall Strategy
- ✓ Deliver Capabilities Not Tool Deployments
- ✓ Create a Defensible and Measurable Organization
- ✓ Elevate Security to a Business Partner
- ✓ Align with Business Goals and Objectives

WHY CYBERSHEATH

Our cyber security experts have advised Fortune 100 and 500 boards on security strategy, partnered with the Department of Defense to create Public/Private information sharing mechanisms, testified before Government oversight committees and are continually sought after around the globe for our relevant experience and expertise.

CyberSheath sees cyber security for what it is; a strategic imperative that requires a documented plan for success that can be measured and explained to your board.
